Mar Cor Purification Announces Distribution Agreement with ELGA LabWater of North America

...Mar Cor expands offering to hospital & laboratory customers

Plymouth, MN, (January 2011) Mar Cor announced today that it has signed a distribution agreement with ELGA LabWater, LLC to sell and service ELGA LabWater systems in North America. ELGA has a wide range of laboratory water purification systems ranging from a few liters a day to several thousand. Laboratory water systems are typically fully functional systems that are designed to produce water for critical applications including research, science, healthcare and biotech. Mar Cor with its extensive sales and service network throughout the US and Canada, will be able to provide these products along with other water purification products including filters, disinfectants, installation, service and spare parts.

According to Chris Fournier, VP Marketing at Mar Cor, “The ELGA product line fills a gap in our offering to Life Science customers that require low flowrate, high water quality, predesigned systems. Many customers are looking for a local water company to help them select the best solution and to be able to provide support for other related services and maintenance. With 22 offices in North America, ELGA LabWater felt that Mar Cor is one of the few companies that can provide the level of sales and service coverage that they need to grow the business. The ELGA line is well known and focused on continual development of new designs to meet the needs of high tech users.”

About Mar Cor Purification

Mar Cor Purification, a wholly owned subsidiary of Cantel Medical Corp. (NYSE:CMN), has service offices in 22 cities in the US and Canada with seven ion exchange resin regeneration plants strategically located in Atlanta, Boston, Chicago, Philadelphia, San Antonio, Montreal and Toronto. The Mar Cor Life Science Group has been serving the water purification marketplace for over 35 years and has over 1000 installations in North America in demanding applications such as pharmaceutical, food & beverage and dialysis and has one of the largest water treatment related technical and field service networks to support our installed systems. We offer support with design engineering capabilities, 24/7 service coverage, field application sales, experienced service technicians, and a fleet of stocked service vehicles. Mar Cor Purification is dedicated to providing innovative solutions through filtration, water, and disinfection technologies. Visit our website at <http://www.mcpur.com>.

About Cantel Medical

Cantel Medical Corp. is a leading provider of infection prevention and control products in the healthcare market. Our products include specialized medical device reprocessing systems for renal dialysis and endoscopy, dialysate concentrates and other dialysis supplies, disposable infection control products primarily for the dental industry, water purification equipment, sterilants, disinfectants and cleaners, hollow fiber membrane filtration and separation products for medical and non-medical applications, and specialty packaging for infectious and biological specimens. We also provide technical maintenance for our products and offer compliance training services for the transport of infectious and biological specimens.
