MAR COR PURIFICATION ANNOUNCES UPGRADED ON-LINE WATER TRAINING PROGRAM DEVELOPED FOR THE DIALYSIS MARKET

...Mar Cor program provides valuable training with Contact Hours for Dialysis water system operators

Plymouth, MN, (September, 2008) Mar Cor Purification announced that it has released an upgraded on line water training program, specifically developed for the Dialysis community. The on-line program has 12 distinct classes, each with an exam, which covers water purification from feed water chemistry to the individual unit operations used to produce AAMI grade water. The upgrade allows classes to be taken at any time by the student with immediate grading of tests and issuance of completion certificates. Options are available for Contact Hours per class and non-Contact Hours.

The program, developed and expanded over several years, is a valuable tool to help educate dialysis personnel in the operation and maintenance of water purification equipment in the clinic environment. The training program is accessible from the Mar Cor website (www.mcpur.com/main/training) or direct at (www.dialysiswatersolution.com). The training can be used to maintain staff capabilities, to educate new employees and or to maintain certification requirements. All of these are necessary to provide the best water quality to ensure patient care.

Mike Verguldi, Product Manager, Medical of Mar Cor Purification stated “Mar Cor has responded to the needs of the dialysis community, to provide education and training to help maintain the high standard of patient care for the dialysis community. The on-line program is one of several training programs offered to meet this important need. In addition to comprehensive O&M manuals, other training offered by Mar Cor includes, a hands-on training course in our factory in Plymouth, MN, and on-site training at the customer’s facility. Mar Cor’s solid 35 year reputation in the dialysis business, provides a level of assurance that the training provided is compliant with all regulations, while advancing the technology so that future regulations are considered.”

Mar Cor Purification has service offices in 19 cities in the US and Canada with ion exchange resin regeneration plants strategically located in Atlanta, Boston, Chicago, Philadelphia, Montreal and Toronto.
